To Whom It May Concern:

While undergoing care from Green Valley Home Health Services I had several people come to see to my needs, but most of the time my nurse was Amelia, a part time RN that took care of my IV antibiotic. Amelia was the consummate professional while keeping her friendly and gentle demeanor. I was appreciative of her skills, both medical and personal as I was nervous and a bit scared of the illness I was fighting. I am one of those patients who wants to know everything going on and I found Amelia was confident and explained all my questions with patience and kindness. She took great care of me.

I appreciate the care I got from Green Valley and in the future, if necessary, I will feel confident in calling Green Valley IF all of your RN's are as good as Amelia.

Thank you
